

Team Master's Projects 2018-19

 **3M** Science.
Applied to Life.™

Marketing Communications Campaign

 **Alnylam**[®]
PHARMACEUTICALS

Discovery of Liver targets for Obesity Using
RNAi Therapy

 **AMGEN**

Clinical Supply Chain Best Practices

 **AMGEN**

Fracture Liaison Service NewCo

 **AMGEN**

Developing Next Generation Microbial
Processes

 **B:OMARIN**

Understanding the Digital Biomarkers
Landscape in Drug Development

 **B:OMARIN**

Order to Cash & Training Management

 **B:OMARIN**

Injector Devices Technical Due Diligence

 **Boehringer
Ingelheim**

Computational Fluid Dynamics on Scale
Up/Scale Down of Bioreactors

 **Catalent.**

Combining the CDMO Business Model and
Continuous Processing

 **Coherus.**
BIOSCIENCES

Cell Line Optimization

Medtronic

Ortho Clinical Diagnostics

Medicare Market Strategy and User Experience Analysis

Development of a Holistic Laboratory Automation Strategy for LRL

Technical Services Laboratory

Reducing Time to Production through Novel Manufacturing Operational Efficiencies

Market Analysis Expanded Menu for Panther Fusion

Quality Systems Integration

Data Analysis to Assess Factory Calibration Feasibility for Ortho Clinical Diagnostics Microslide Assays

Global Product Development-Inflammation & Immunology Therapeutic Area

Tangential Flow Depth Filtration Validation

The Emergence of Artificial Intelligence (AI) in Cancer Diagnosis

Adoption of Whole Exome/Genome Sequencing

Particle Characterization

 **SomaLogic**

UNITY
BIOTECHNOLOGY

Go to Market Strategy for Health & Wellness
Products

Protein Engineering
